### SCREAMIN' EAGLE 6-SPEED REBUILD KIT

This rebuild kit has been created by JIMS to help make rebuilding your Screamin' Eagle 6-speed transmission simpler by assembling all the parts needed under one part number.

Always refer to your H-D service manual for the model you're working on before starting your rebuild service for all specifications and technical information.

**Note:** Most of these parts, but not all are very similar to the last produced 5-speed OEM model transmissions except it's a six speed. Some gears, shafts, shift rings are exclusive and must be ordered through your favorite Harley-Davidson dealer if needed.

If you have any questions on this transmission, you can call JIMS Tech Dept for Information at 805-482-6913.

See JIMS catalog or go to web site, [www.jimsusa.com](http://www.jimsusa.com) for a complete line of tools for rebuilding or servicing your transmission. JIMS manufactures a complete line of American made tools for all areas of the motorcycle.

The following is a complete listing of the parts that are included under in each kit part number.
